Total loans disbursements (since inception)	USD	700,267,420.17
Number of loans disbursed (since inception)		622

\*Net Assets are equal to Total Assets less liabilities, plus current receivables net of current payables.

**DMCF - Investment manager's comments**

The Dexia Micro-Credit Fund posted a flat to slightly negative performance in its three share classes this month as we took provisions against loans to three microfinance institutions (MFIs) in Nicaragua that offset the portfolio's income accruals. The microfinance sector in Nicaragua has suffered from negative economic and political developments over the past several months, and many MFIs have seen a deterioration in portfolio quality and decline in profitability. The international financial crisis has hurt exports and remittances from Nicaraguan workers abroad, particularly given the country's close ties to the U.S., and this has impacted the repayment capacity of some of the MFIs' borrowers. In addition, a "no pay" movement in the North of the country has caused problems for MFIs with operations in that region. BlueOrchard has been taking a proactive role in creditors' groups, is closely monitoring the situation, and will keep investors informed of developments. Overall exposure to Nicaraguan MFIs in the fund is relatively low, and currently equals 3% of NAV. Elsewhere in the portfolio, performance of the MFIs remains largely stable and new loans of USD 14.4 millions were made this month. The new loans were made to a diverse group of MFIs located in Peru, Paraguay, Albania, Kosovo and Georgia. Significant loan maturities and amortizations during September, and a decline in the value of the USD versus the EUR and CHF (which makes the EUR and CHF share classes increase in value relative to the USD-denominated portfolio), meant that the cash position of the fund is slightly higher than in last month's report. The microfinance portfolio currently equals 73% of NAV.

**DMCF - Performance chart - USD share class**

**DMCF - Social performance indicators**

Total # of microentrepreneurs reached by MFIs in the portfolio	9,157,877
Number of microentrepreneurs reached by funding provided by DMCF	383,229
% of rural clients*	43%
% of female clients*	52%
Average loan outstanding	1,505

\*Data as of 30 June 2009

**DMCF - Exposure by country (in % of NAV)**

**DMCF - Exposure by region (as % of total assets)**

**DMCF - Five largest outstanding positions (as % of NAV)**

**Fund description**

The BlueOrchard Microfinance Fund for US Investors invests in the Dexia Micro-Credit Fund which invests in debt instruments of up to 3 years in maturity issued by microfinance institutions (MFIs) located in Africa, Asia, Eastern and Central Europe and Latin America. The MFIs provide small loans and other financial services to microentrepreneurs who lack access to traditional banking services. With the capital provided by these loans, microentrepreneurs are able to develop and grow productive businesses and improve their families' standard of living. Thus, the DMCF seeks to achieve an attractive return for investors while providing important social impacts, including poverty alleviation, empowerment of the working poor and the strengthening of inclusive financial systems. The target annual return of the fund is 6-month Libor plus 1-2%.
